The Early Hearing Detection and Intervention (EHDI) Program works to ensure that all newborns and toddlers with hearing loss are identified as early as possible and provided with appropriate audiologic, educational, and medical intervention.

### What We Do

We support families of children with hearing loss so that they are equipped with the necessary information and resources. We are dedicated to a lifelong care model, providing unbiased support to families of children who are deaf or hard of hearing. The work we do is driven by the national EHDI goals that aim to advance EHDI systems of care.
